**Subject:** Microsoft Settlement

I would like to add my opinion to those you consider in light of the proposed settlement of the Microsoft anti-trust case. It is my belief that the settlement does not go far enough in its remedy in terms of allowing for a competitive atmosphere in the desktop software development arena. The settlement will pretty much allow Microsoft to continue in it's business-as-usual, a practice that has indeed been adjudged as monopolistic.

Thank you for your consideration.
